

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

<i>Medicine in China: Dr. George Blumer. Hallwachs's Lichtelektrizität: Professor R. A. Millikan. Kershaw's Sewage Purification and Disposal: Professor George C. Whipple</i> .....	940
<i>Proceedings of the National Academy of Sciences</i> .....	945
<i>Special Articles:—</i>	
<i>The Continuous Spectra of Gases: Professor E. P. Lewis</i> .....	947
<i>The Iowa Academy of Science: Dr. James H. Lees</i> .....	948

MSS. intended for publication and books, etc., intended for review should be sent to Professor J. McKeen Cattell, Garrison-on-Hudson, N. Y.

## AUGUST WEISMANN<sup>1</sup>

AUGUST WEISMANN, a foreign member of this society, was born at Frankfort on the Main, January 17, 1834, and died at Freiburg in Breisgau, November 6, 1914. He early showed the traits of a naturalist and in one of his books speaks of the excitement he felt as a boy in catching butterflies. He attended the University of Göttingen, where he studied chemistry and medicine, coming especially under the instruction of the distinguished anatomist Henle, and receiving the degree of M.D. in 1856. After spending three years at Rostock as an assistant he began the practise of medicine at Frankfort and during this time he visited Vienna in 1858, Italy in 1859 and Paris in 1860. From 1861 to 1862 he was private physician to Archduke Stephan of Austria at Schamburg Palace. He then studied zoology at Giessen under the renowned zoologist Leuckart and became privat-docent in zoology at the University of Freiburg in 1863, where he spent the remainder of his life. In 1866 he was appointed professor extraordinarius and a few years later became professor ordinarius, which position he continued to hold until a few years before his death, when he was made professor emeritus.

In person he was a man of striking appearance, being about six feet tall and well proportioned and having a fine head and face and an earnest but kind expression of the eyes. From 1864 to 1874 and again from 1884 on he suffered from an eye trouble which interfered greatly with his
